DETAILED ACTION

1. This application has been examined. Claims 1-5 as amended under Article 34 in the underlying PCT application PCT/JP04/17221 are currently pending.
2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
3. The IDS filed 5/2/06 has been considered.
4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-4 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
 - A. As per claim 1, the claim is directed to a mathematical algorithm which does not include a physical transformation. The claim calculates a direction in which a tire generating force acts on a tire using a performance function. The performance function is disclosed as equation (20) on page 13 of the specification. The performance function merely manipulates abstract numbers and the claim as a whole does not transform any physical object or substance, or an electronic signal representative of any physical object or substance, into a different state or thing.
 - B. Claims 2-4 further define the calculations performed in claim 1.
6. Claim 5 is allowed. The prior art of record does not show or reasonably suggest, in combination with the other claimed subject matter, a vehicle body motion realization apparatus which includes control means for controlling the steering angle and braking

and driving forces of each wheel based on the direction in which a calculated tire generating force acts whereby the calculated direction is based on evaluation of a performance function as defined in the "wherein" clause (i.e., eqn. (20) on page 13 of the specification).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael J. Zanelli whose telephone number is (571) 272-6969. The examiner can normally be reached on Monday-Thursday 9:00 AM - 4:00 PM.
